

Aubrey Cook

Web Developer

Crystal Lake, IL 60014 | +1 815 *** **** | aubreyjcook.contact@gmail.com

Professional summary

Programmer with an exceptional drive to deeply understand fundamental systems of technology and how they are integrated in our daily lives. Focus on using comprehensive mental models to understand and solve problems, generating value for others.

Mainly experienced in JavaScript, with a preference for TypeScript over vanilla JS. Highly experienced in HTML, and CSS. Equipped with a strong mental model of the fundamental building blocks of the web. Experienced in React.JS as a solution for developing most front-end applications. Familiar with Next.JS, utilizing it as a well-rounded solution for any kind of website or modern web application.

Other areas of experience are Node.JS, PHP, WordPress, and several other frameworks, libraries, and run-times. Preference for Tailwind.CSS for styling on the web. Possesses an overall familiarity with frameworks as a versatile solution to many problems, without over-reliance.

Interested in Rust, and cyber security. Preferred operating system is Linux, especially ParrotOS. Familiar with Windows, and Unix.

Authorized to work in the US for any employer

Work experience

Web Content Coordinator

Center for Inquiry | Remote

May 2022 to Present

- Managed updates for over 5 websites using WordPress, React, Gatsby, HTML, CSS, JavaScript, and PHP code, ensuring timely and accurate content delivery.
- Oversaw the posting of content on a heavily modified WordPress multi-site, maintaining consistency and quality across all websites.
- Provided web-based technical support management, resolving user issues and improving site reliability.
- Improved website and content SEO by implementing best management practices, increasing organic traffic.

Web Content Developer

Elsevier RELX | Remote

March 2022 to May 2022
